

User Guide

1. Welcome to InfluenceAI

Welcome to InfluenceAI! This application is a smart assistant designed to help you create and share professional content for your LinkedIn profile, enhancing your personal brand and engagement.

2. Getting Started: Logging In

To begin, you need to connect your LinkedIn account. This process is safe and secure, and the application will never see your password.

- **Step 1:** Navigate to the application website:
<https://influence-ai-frontend.vercel.app/>
- **Step 2:** Click the **"Login with LinkedIn to Get Started"** button.
- **Step 3:** You will be taken to the official LinkedIn website. Please sign in with your LinkedIn email and password.
- **Step 4:** LinkedIn will ask you to authorize InfluenceAI. Click **"Allow"** to grant permission. You will then be automatically redirected back to the application's main dashboard. You will see a personalized welcome message with your name and profile picture.

3. How to Generate Content

Once you're logged in, creating content is simple.

- **Step 1:** In the **"Your Professional Role"** box, type your job title (e.g., "AI Intern").
- **Step 2:** In the **"Topic to Write About"** box, type the subject for your post (e.g., "My experience building a full-stack AI application").
- **Step 3:** Click the **"Generate Post"** button.
- **Step 4:** The new, AI-generated post will appear in the "Generated Post" section below the form.

4. How to View and Share Your Posts

All the content you create is saved for you.

- **Step 1:** Scroll down to the **"Post History"** section to see all the posts you've created.
- **Step 2:** Find a post you'd like to share on your profile.
- **Step 3:** Click the blue **"Share on LinkedIn"** button next to that post.
- **Step 4:** The post will be automatically shared to your LinkedIn profile! You can visit your profile to see it live.
